

Prescription drugs are expensive...is there a way I can save money?

Yes! A website called www.internetdrugcoupons.com has over 400 free coupons for prescription drugs, over-the-counter medications and medicines for pets.

How do I use the website?

1. Go to www.internetdrugcoupons.com
2. On the left hand side of the page, type the name of your drug in the search box or scroll through the alphabetical listing of available drug coupons.
3. Once you find the drug you are looking for, simply click to be redirected to the coupon offer.
4. You can then print the offer and take it with you to your pharmacy.
5. Remember to always consult your doctor or pharmacist if you have any questions on your medication or before changing or stopping medication.

Check out the back of this flyer for sample savings on common prescription drugs!

Below are a few of the coupons available on common Rx drugs
